

One System for Global Background Screenings

In the US, 89% of HR professionals believe it is important to have access to International Background Checks. Yet, many companies struggle to find a single provider that can meet their domestic and international requirements. The result is disparate processes, that result in longer turnaround times, poor hiring experiences, and ultimately higher costs.

That's why in addition to our industry-leading domestic products, Checkr offers background check screenings in 223 countries around the world. This means that you can manage background checks for all of your domestic and international candidates in a single platform, with a unified billing system.

Checkr's global screenings platform can help you increase operational efficiency and create a better hiring experience for your team and candidates.

Automated Compliance Workflows

For each candidate you screen, Checkr automatically requests the appropriate information and documentation for candidates in any region. This increases productivity for your team, and makes complying with complex, regional requirements easy.

Frictionless Candidate Outreach

Recruiters often have to spend days reaching out to candidates to collect the appropriate information required to run their background checks. Checkr sources information from your candidates directly, so you can simply request the check and receive results.

Guidance and Visibility for Candidates

Candidates are generally unfamiliar with the background check process, and often need to dig up information that they don't have on hand. Checkr's Candidate Portal provides step-by-step guidance throughout the background check process, and empowers candidates to save their progress, see their results, and dispute any errors.

Global Background Check Screenings

Checkr offers background check screenings in 223 countries around the world. Depending on the country, we offer a combination of Criminal Screenings, Global Watchlist Checks, Education and Employment Verifications and Adverse Media Searches.

Screenings Available

International Criminal Search

An in-country search leveraging multi-jurisdictional repositories and database sources to return major offense conviction records. In nations where third party access to criminal record information is restricted, adverse media checks can be performed.

Global Watchlist Search

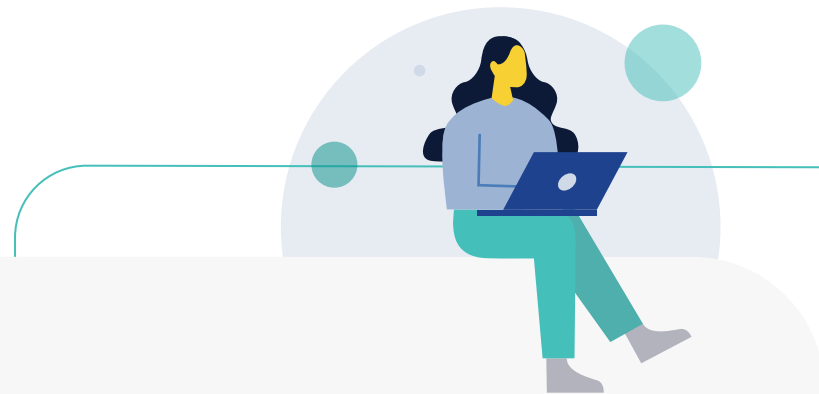

Comprehensive search of multiple National and International government watchlists, for example: FBI Most Wanted Lists, Interpol's Most Wanted Lists, etc.

International Education Verification

The verification of academic status of any educational level such as high school, college and post-grad.

International Employment Verification

Verification of previous employment history through government agencies, employment databases, email verification, and/or phone verification.

Regions We Support

Checkr offers background checks in 223 countries around the world.

Europe, the Middle East & Africa

Key countries include but are not limited to:

- France
- Germany
- Ireland
- United Kingdom
- More...
