# Take Recruiting Into the Age of Collaboration

Google Docs. Salesforce. Slack. Collaboration tools dominate the modern workflow. Companies of all sizes recognize the significant ROI collaborative tools bring.

It is time to bring those benefits to HR and recruiting. Which is why we developed Comeet. A collaborative recruiting platform, it takes you from requisition to hiring in one seamless, semi-automated process.

**The collaborative nature of our process ensures better hiring choices, the kind that fuel your company's growth.**

# Test Drive The Future of Recruiting Today

## Assignment Transparency

Everyone knows what they need to do and nothing falls through the cracks.

## Collaborative Workflow

Hiring teams work together with recruiting leads, rather than being dependent on them.

## Centralized Automation

Everyone and everything is coordinated and scheduled, all on the same page.

## Responsive Evaluations

Evaluations are completed and delivered without having to hound interviewers.

## Prepared Interviews

Interview questions (and answers!) are built in advance, so the interviewer is ready and knows what to look for.

## Data-Driven Reporting

Extensive reporting options provide insights and metrics that keep your bosses happy and the hiring managers informed.

# A collaborative A-to-Z hiring system so intuitive the whole company will love it.

## Leverage the outside world

### Sourcing Options

Unique job email addresses enable you to track and evaluate referral sources so you can identify which work best.

### Simple Social Sharing

Comeet's one-click sharing encourages everyone - employees and friends - to spread the word about open positions to a wider audience.

### Connect with External Agencies

Stay connected with agency recruiters so you can track referrals, request more information and notify them of progress.

### Candidate Profiles

Comeet collects additional information on candidates from social media accounts and aggregates the information in one place.

## Work together easily

### Integrated Communications

An integrated email system features customizable templates and smart automation all while organizing all correspondence in one place.

### Build Powerful Hiring Teams

You have the flexibility to invite anyone to the hiring team, assign roles and access permissions.

### Integrated Interview Scheduling

Integrated calendars and scheduling make it simple to keep your hiring team and candidates in sync, whether they're in the office or on the road.

### Intelligent Automated Workflows

Preconfigured by us or customized by you, workflows automate hiring step and eliminate administrative work.

## Optimize the experience

### Curated Interviews

Curate or crowdsource questions and assign sets by interview type (i.e. behavioral vs. technical) to learn what you need from a candidate.

### Detailed Reporting & Insights

Extensive reporting options by position, source, and hiring team member enable you to be as granular as you want.

### One-Click Screening

Log your interest in a candidate or lack of it with one click on the Go/No Go button. Great feature when you are sorting dozens of applications.

### Security and Privacy

Comeet uses the most advanced security, coding practices, and access permissions expected of enterprise software.

# Why do companies love Comeet?

*“Comeet is a great way to manage candidates quickly and easily. The design keeps you focused and efficient, helping you consistently hire the best...”*

**Mario Fiasconaro**  
Managing Director, Italy
