

The ultimate employee management solution

Deputy offers you the best technology in a web-based solution

Spend more time working on your business, not in it

SCHEDULING

Create fully costed employee schedules in no time. Notify everyone with just one click and seamlessly export to payroll software.

TIME CLOCK

Easily capture when and where your people work for greater HR compliance, payroll accuracy, and insight into workforce productivity.

COMMUNICATION

Give your staff an easy way to stay informed, share important messages, and contribute to the workplace conversation via their mobile devices.

INTEGRATION

Integrate with your POS data to optimize scheduling. Connect with all leading payroll providers to create a truly connected business.

TASKING

With applications for Android, iPad, iPhone, and Apple Watch, it's easy to manage your workforce from any location.

MOBILE

Create and assign tasks to your staff. You'll even get notified when they're done.

deputy

deputy.com | 855-633-7889

Deputy simplifies your scheduling, timesheets, tasking, employee communication, and administrative tasks. With brilliant apps and one-click payroll integration, we make your life easier.

Create optimized employee schedules in minutes

Full visibility of your employee stress levels, their qualifications, allocated shifts, and labor costs. Send a message to available employees in seconds to find a replacement without disrupting your whole day.

Stay in control with real-time business intelligence

Multiple reports available, automatically generated with no customization required.

Streamline your processes

Deputy integrates with all major payroll and POS solutions - automatically import or export data once, and avoid double handling.

Track time and attendance with geo-location and face detection technology

Minimize time theft and stay in-control of your business even from home. Our Find a Replacement feature allows you to cover shifts in minutes.

Communicate with instant messaging and keep your team aligned

Track compliance with individual tasks, record performance with journals, and view real-time announcements across all your devices.
