## How does the integration work?

With this integration, organizations can seamlessly sync employees from BambooHR to FaceUp, ensuring consistent people analytics across platforms. When a case is submitted, administrators can quickly select the employees involved, enabling precise analytics and easy filtering by employees.

Additionally, organizations can effortlessly send surveys to BambooHR-synced employees through FaceUp, gathering valuable feedback and tracking engagement with ease.

## Key benefits of the FaceUp integration for BambooHR

- ✔ **Seamless Employee Sync**  
Automatically sync your employee data between BambooHR and FaceUp, saving time and ensuring accuracy across both platforms.
- ✔ **Enhanced People Analytics**  
Gain deeper insights into employee involvement in cases, allowing for more precise tracking and analysis of participation trends.
- ✔ **Targeted Employees Surveys**  
Effortlessly send surveys to your BambooHR-synced employees through FaceUp, gathering valuable feedback and tracking engagement.
- ✔ **Easy Filtering for Targeted Insights**  
Filter cases by specific employees to quickly access relevant cases and better understand individual engagement and patterns.
- ✔ **Improved Data Consistency Across Platforms**  
Maintain a unified view of employee data and reporting, ensuring consistency and better data alignment for informed decision-making.

## How can I set up the BambooHR integration?

You can set up the integration quickly by following this guide:
