

Connect BambooHR to Aquera for Automated Identity & Access Management

Aquera is a provisioning platform that automatically syncs employee records from BambooHR® into identity directories and downstream applications, giving HR and IT teams a seamless integration for onboarding, offboarding, and data consistency.

[Get the Integration →](#)

What can you do with BambooHR® + Aquera?

Create new user accounts automatically.

Revoke system access instantly and securely.

Sync employee changes across systems.

Identity sync & provisioning at scale

AUTOMATED ONBOARDING

As new employees are added to BambooHR, they're imported into the connected identity management platform or directory. From there, users can be provisioned into the appropriate applications.

SEAMLESS OFFBOARDING

When employees leave the company, their status is updated in BambooHR, triggering the connected identity management platform to automatically remove them from any applications to which they had access.

TWO-WAY DATA SYNC

Employee profiles are automatically updated into the identity management platform when changes are made in BambooHR.

BRIDGE MAINTAINED BY AQUERA

Aquera maintains this bridge with no custom coding or updates required by the customer.
